Education

George Washington University

MS Computer Science — **SEAS Dean's Award Recipient** — **GPA: 3.97/4.0**
AWS Certifications: Cloud Operations (Nov 2024), Cloud Foundations (Sep 2024)

Washington, DC

Jan 2024 – Dec 2025

St. Xavier's College

BS Computer Science & Information Technology — **GPA: 3.89/4.0**

Kathmandu, Nepal

Aug 2018 – Dec 2022

Experience

ECS Tech – FinTech Payment Platform

Lalitpur, Nepal

Software Engineer (Promoted from Intern, Sep 2022)

Jun 2022 – Sep 2023

- Owned development of **7 production features** for fintech payment platform serving **50+ small business clients** using **React.js, Node.js, Express, and PostgreSQL**, building customer-facing solutions for booking, payments, and scheduling workflows.
- Architected automated booking system with RESTful API backend, PostgreSQL database, and React frontend, eliminating **89% of scheduling conflicts** and saving support team **15 hours weekly**.
- Led delivery of booking calendar, coordinating with 5 cross-functional stakeholders to ship **2 weeks ahead of schedule**. Mentored 2 junior developers on React optimization (code-splitting, lazy loading), achieving **43% faster page loads** that increased user conversion from **12% to 16%**.

George Washington University

Washington, DC

Graduate Teaching Assistant – Design and Analysis of Algorithms

Aug 2024 – Dec 2025

- Taught **60+ graduate students** advanced algorithms (dynamic programming, graph theory, NP-completeness) across **4 sections**, contributing to **22% improvement** in average midterm scores through clear technical communication.

Intel Security Service Pvt. Ltd.

Kathmandu, Nepal

IT Solutions Lead – 6-Month Contract

Aug 2022 – Mar 2023

- Led digital transformation as sole technical decision-maker for **25-person** security consultancy, rebuilding website using WordPress, MySQL, and custom PHP into lead-generation platform that increased qualified leads by **73%** and generated **\$35K in new contracts**.
- Managed **\$12K annual IT budget**, negotiating vendor contracts and reducing operational costs by **40%** while eliminating **\$25K external contractor dependency** through in-house solutions.

Projects

TalkifyDocs – AI Document Chat SaaS — Live Demo — GitHub

2025

Next.js, TypeScript, OpenAI GPT-4, LangChain, Pinecone, PostgreSQL, Stripe

- Built production AI SaaS using **OpenAI GPT-4 API, Gemini Flash** and **RAG architecture**, processing **large document repositories** with **94% parsing accuracy**. Architected full-stack system with Next.js/TypeScript, PostgreSQL (Prisma ORM), tRPC APIs, and Pinecone vector database, achieving **sub-200ms query responses**.
- Implemented authentication (Clerk), Stripe payment processing, subscription billing, and real-time document upload, demonstrating complete SaaS product development from design to production deployment.

InfraSight – Cloud Cost Intelligence Platform — Live Demo — GitHub

2025

Python, FastAPI, PostgreSQL, scikit-learn, Docker, React, AWS

- Developed ML-powered analytics platform reducing AWS cost analysis time by **70%**. Implemented forecasting pipeline with **Random Forest + LSTM ensemble** achieving **92% prediction accuracy**, plus Z-score anomaly detection, enabling teams to catch cost spikes before billing cycles close.
- Architected production system with Docker containerization, PostgreSQL database, JWT authentication, and AWS Cost Explorer integration, achieving **sub-200ms inference times** for real-time predictions.

MelodyHub – Real-Time Social Music Platform — GitHub

2025

Node.js, React, TypeScript, MongoDB, Socket.IO, Docker

- Built real-time music streaming platform supporting **100+ concurrent users** with synchronized playback and live chat, achieving **99%+ uptime** during 2-month testing with **50+ GW students**. Led 3-person Agile team with Node.js/Express backend and React/TypeScript frontend, reducing feature development time by **60%** through reusable architecture.
- Integrated Cloudinary CDN and Clerk Auth, handling **500MB+ daily uploads** with **sub-3-second load times** through Docker deployment and optimized caching.

Technical Skills

Languages: Python, JavaScript, TypeScript, Java, C++, SQL, HTML/CSS

Frontend: React.js, Next.js, Tailwind CSS, Redux, TypeScript, Responsive Design

Backend & APIs: Node.js, Express, Python (FastAPI, Flask), RESTful APIs, Microservices

Databases: PostgreSQL, MongoDB, MySQL, Redis, Prisma ORM

Cloud & DevOps: AWS (EC2, S3, Lambda, Cost Explorer), Docker, Git, CI/CD

AI/ML: OpenAI GPT-4, LangChain, RAG, Pinecone, scikit-learn, TensorFlow, Keras

Tools: Git, Agile/Scrum, Unit Testing, System Design, OOP, Data Structures & Algorithms
